

# LITTLE WONDER: TRIO IS THREE TIMES AS GOOD

In the last issue of Print Solutions, we featured the world's smallest, lightest all in one printer. We gave you a quick overview of the new Trio from Primera, but we thought that you might like to know a few more technical details, so here we go!

This little thermal inkjet printer really is three times as good. It prints, copies and scans in full colour or monochrome; it weighs only 1.2 kg (that's 2.7 lbs), and is about the size of a hardcover book, so you can easily fit it in a laptop bag or briefcase (or even a handbag if you carry a hefty one like I do!).

The Trio comes ready supplied with black ink cartridge, CD with printer and scanner drivers, application software and user documentation, AC adaptor with power cord and plug adaptors for UK, EU, and Asia-Pacific, three foot micro USB to USB cable, and scanner calibration sheet – so you can get printing straightaway.

## A TRIO OF GOOD REASONS

It really means you can print great quality on the go as the Trio uses standard paper stocks rather than thermal paper,

so documents are ready to present straight off the printer. You can print onto A4 paper, 4" x 6" borderless photos, card stock and even onto specialty media such as labels and postcards.

It prints in full colour or black at up to 4800 x 1200 dpi. Scanning resolution is a full 600 x 600 dpi.

Promises all the functionality that you would get from a full size all in one printer.

## HERE ARE THE DETAILS

The Trio connects to any computer, laptop or tablet that has a USB port.

It comes with Primera PTgo! scanning and copying software, which means that your scans can be saved as pdfs, jpgs or other common file formats.

There is an option of an extra battery pack that allows you to deliver up to 100 printed pages on a single charge.

The option of vehicle mounting brackets, means the machine can be used in delivery vehicles, or where documentation is needed on the go.

The Trio measures up at 290 mm width x 4.6 mm height x 165 mm depth.

You can also get personal with the printer as it comes in a number of colours from silver to white, from black to blue – and even pink (ahem, we like the white one!). You just snap on the colour of your choice.

It is also very cost effective as the Trio has a manufacturer's suggested retail price of only €375 (and is available in most popular web stores). **PS**

## HOW DOES IT WORK?

The top cover opens to reveal a built in 10 sheet input feeder. A rotating printhead is then moved to the 'up' position so that the printer is ready for use. For travelling, the printhead folds back down, caps itself to prevent drying out or leaking while in transit, and the top cover folds back into the case.

If you feed an original into the rear paper slot copying takes place automatically. This back slot also allows users to feed light cardstocks for printing.
